

**LEGEND**

- 10ft Contour depth difference between flights with labels
- 2ft Contour depth difference between flights
- Volume Calculation Boundary
- Area that was extracted and then filled between flights. Not represented in depth contours (volume calculated from 8/17/2018 flight down to 1131' and added to quantities)
- 0 Cut Value (on 80ft grid)
- 0 Fill Value (on 80ft grid)

Note: Negative contour values represent a cut

Monthly Mining Quantities - XX Site						
August 17th through September 17th, 2018						
Site	Acres	Cut (cy)	Fill (cy)	Net (cy)	Initial Flight	Ending Flight
Mining Area	12.3	*123,456	12,123	111,333 (Cut)	9/23 - 11:30am	11/14 - 10:45am
Stockpile Area	6.1	12,123	1,123	11,000 (Cut)		
<b>Total</b>	<b>18.4</b>	<b>135,579</b>	<b>13,246</b>	<b>122,333 (Cut)</b>		

\*Includes 12,123 CY that was extracted (outlined in green) below the current water level. From 11-14-18 flight down to 1131'.

A small amount of material may have been filled underwater which the ground data will not cover.
